137,100 square yards of asphalt surface. This requires 15 car-loads of asphalt and 60 carloads crushed limestone.

There will be 146 agres to be seeded and fertilized, and 5,400 square yards to be sodded.

The total cost of the improve ment project, according to Mr. Richardson, will be approximately \$250,000.00.

The grading and gravel - pro cessing contract is being done by the firm of Cheney & Wright, of Williamston, Mich. The contractors are operating 21 hours each day with a six-day week. By their contract they are required to remove 5000 cubic yards of earth each eight hour period.

Between 60 and 70 men are now on the job daily.

Runways will be built diagon ally from corner to corner of the field one % mile and the other % mile in length. These will be 150 feet in width: It is very probable that other improvements besides those mentioned above will be installed, such as lighting, of fine grading and clay hangars and other features that zation, requiring 50,000 usually go with a modern airport.
